The World's Diamonds. Nearly the entire diamond trade of the world is controlled by the De Beers Company, and the London syndicate receives almost all their output. Dealers all over the globe are compelled on this account to come to London for the rough stones. Most of these have to deal through brokers, who sometime represent a good many houses. America, with its many millionaires, uses about two-thirds of the total diamond product of the world, and the Americans are very particular as to the quality of the stones they buy.

The Most Ancient of Crowns. Among the crowns preserving the ancient form more than any others now worn is the so-called iron crown of Lombardy, which is the most treasured National possession of the Italian kingdom. It is of golden "plaques" or panels rather longer than they are high, but small in size, so as not to rise above the top of the nead. They form, indeed, only a jointed band of foliaged, embossed relief-work, and one narrow wire of iron binds them together in the inside-this wire having the repute of being hammered out from one of the nails of our Saviour's cross. It was the enlargement of these panels in other crowns which led to the crossband or "closure" of the crown. Look at the German crown and the Austrian, both adaptations of that of the old Emperors of the "Holy Roman Empire." The "arch of empire" became the result in the crown of the necessity for fastening panels for protection for the head from any stroke from above delivered in war.—Leslie's Monthly.

Stunts of a Convict Genius. A. E. Wyckoff, of Chillicothe, Mo., is applying to Governor Nash for a pardon for George Hon, a convict from Adams County serving a ten-years' sentence for the forgery for twentyfive cents' worth of tobacco. Hon was the first prisoner confined in the new West Union jail. The contractors offered a prize of \$100 to any prisoner who would escape from the cells. It was but twenty-four hours before Hon was at liberty. The Sheriff put two bloodhounds on his track. Hon stole the dogs and sold them to a farmer for \$5. At Manchester he stole the laprobe and cushion from the buggy of the Sheriff. He reached Wisconsin, was recaptured and brought back for

The contractors refused to pay the \$100 to Hon on the ground that he had been aided by some one on the outside. He employed an attorney and brought suit, but lost his case.-Cleveland Piain Dealer.

Pensalan Railway System. The Prussian railway system is the

property of the State; it has been slowly developed from small beginnings into an organization which pays above its operating expenses not only the entire interest on the Prussian debt, but turns an annual surplus of many millions into the public treasury. That the rates for freight and first class passenger fares are very high-so high, indeed, that the former constitute a heavy handicap on agriculture and on long? many inland industries—is unquestionable. German miners and manufacturers look with envious surprise upon the economies of railway freight in America, and their main hope for the future is in the extension and improvement of the inland river and canal There will be only four directly, be- situated in what would be the hold by the imperial government.

Cologne, a city of 384,000 inhabitants. has there municipal bath-houses. The daily number of bathers in 1196. The price of a bath varies from two cents to twenty-eight cents.

THE HARVEST.

Oh, I saw her at the time of the sowing of the grain! sun had broken through a filmy mist of rain. And a little wind and sweet

Swayed the grasses at her feet As I turned to look and turned to smile and turned to look again, And I said, "How good a thing Is the promise of the spring!" At the time of the sowing of the grain.

Oh, I kissed her at the time of the growing of the grain!

Her laugh was like the melody that threads

the lark's refrain;
Bud and blossom everywhere
Sent their perfumes through the air.
And the branches bent above her where the ripening grain was lain, d I said, "Lo, love hath grown

And I said, "Lo, love hath g Like the seed thy hand hath At the time of the growing of the grain. Oh, I won her at the time of the mowing

of the grain!
We guided o'er the empty fields the heavy laden wain, And my life was like to sing With the joy of harvesting!

Oh, love's sowing nor his growing nor his mowing was in vain.

And I said, "Give thanks, my heart, For the store that is thy part!"
At the time of the mowing of the grain. -McCrea Pickering, in the Smart Set.

To Millionaire's Match Box.

KKKKKKKKKKK

MAKANANAKK T E had pressed upon me one of his high-priced eigars.

"Thanks," I said, "Match?" "No. Come on. Hurry." My friend the millionaire looked perturbed for a moment. Then his countenance cleared. "We shall be at Waterloo in twenty minutes," he said, "and then we can get a light at the refreshment room. They never mind your taking a match of two."

"No good," I said. "I want to smoke now. Hand over your box."

With great reluctance he handed me his gold matchbox, with his mongram on it in emeralds-a pretty, unostentatious little toy. He shut both the carriage windows, so that no draught should necessitate the use of more than one match. I opened the box and examined the

contents with care. He did not like his mind to buy matches for himself. the examination. He winced under it. He grew nervous.

"Come, come," he said, "light up and give me the box back."

"How long has this been going on?" I asked. "What do you mean?"

"You know perfectly well what I mean. There are several different kinds of wax matches in this box." "Well, there's nothing in that. Some-

another." "But you don't buy six different kinds at once, and then put some of You are probably a liar also, for I gaged in actual work. doubt if you have ever bought matches

two," he said, feebly. them?"

surely I have a right-"

"You have no more right to take to pocket the club spoons, and you and their power can be better appreknow it. What about this match? It has been carried loose in the pocket and is dirty. It has a pink head. It is evidently of a very chean kind. I should say it saved the smoker thirtythree per cent. Where did you get it?"

"Look here," he said, irritably, "I won't submit to these questions. Give me my box back at once." He made a grab at it, but I eluded him.

"You have to submit to these questions and to answer them truly, unless you want to be shown up. Ever heard of the public prosecutor? Theft is theft, and it's serious. Once more, where did you get this wretched little match? It looks like some poor man's ewe lamb."

"If you want to know, I got it from a railway porter," he said, sulkily. "He gave it to you on the under-

standing that you wished to use it at once. You deceived him and sneaked it-a poor man's solitary match. My word, but you've fallen low, very low." "You don't know that it was his only maten."

"It's probable, and you don't know that it wasn't. What about this onethe very short one, with the mud on

"I came by it perfectly fairly. A small boy in the street dropped it. He looked for it some time, but he couldn't see where it had gone. I saw it. I waited about, pretending to look engineer were provided with instruin a shop window until the boy had ments to measure the compression, gone, and then I picked it up. The delphia Record.

matches were on his table in a ribbedglass thing. Well, that was my chance, Any other man would have done the same thing."

"Any other demoralized blackguard

might have done." "I am not going to sit here and listen to this abuse. What business have you got with my private affairs? What does it matter to you how I get my matches? I gave you a cigar."

"I am not ungrateful, and for that reason I have decided not to give your name and address when I show you up. But none the less I am a believer in truth and honesty, even in small matters, and-"

"O never mind that. Give me back my match box."

"Wait. When I see crime I have got to punish it. I am sparing you public disgrace and perhaps a long sojourn in a felon's cell, and that is sufficient reward for a cigar, which is certainly too good to be allowed constantly to go out like this."

I relit it with the match that the little boy had dropped. The millionaire nearly screamed with anguish, for it was the third match I had taken. He said that if I behaved in other matters as I did with regard to matches, I should soon be a ruined man. I continued:

"But though I spare you public disgrace the punishment must be severe. My own conscience would never be easy if I did not do my duty-if I did not give you a lesson which you would not be likely to forget. I am sorry for you, but it cannot be helped."

I let the window down with a bang, emptied the remaining matches out on to the line, shut the box and returned it to him with many thanks.

He said that I was mad, and made dash for the alarm in order to stop the train. As I held him I pointed out to him "at his view as to matches was not the general view, and if he stopped the train to recover the few which I had thrown out of the window, he would get himself into trouble.

He sank back on the cushions-silent, sulky and defeated. After a while he said he was sorry be had ever given me the cigar. I explained that I, on the contrary, was glad.

When he got out at Waterloo I led him to the automatic machine, gave him a penny and told him to make up With a look of diabolical cunning he slipped the penny into his pocket and dashed off to the refreshment room. When I last saw him he had intrepched himself behind the hot-water apparatus, and was waiting with sparkling eyes for a chance to steal a few more matches.

Once a match thief, always a match thief, and when a match thief is also a millionaire his case is peculiarly times I buy one kind and sometimes hopeless.-Barry Pain.

The Crew of a Cable-Ship. So that we may properly appreciate each in your box. I am sorry to say the subject, let us imagine ourselves that you are a thief, a match thief. on board of a typical cable-ship en-

We find a first-class vessel in all -at any rate, in recent years. I re- respects, with uniformed officers and peat my question-has this been going crew, strict discipline maintained and every other feature of expert naviga-"They don't mind you taking one or tion. In addition to all this, we can quickly note the unique attributes "But how about five or six? There specially suited for her distinctive are five or six matches here of spe- field of effort. To begin at the very cial quality, long in the shank, thicker | mainspring of the whole, we find the than usual, made of good white wax. cable coiled away in big iron tanks, cause I am going to light my cigar of a cargo ship. These tanks are from with one of them. Where did you get thirty to forty feet in diameter, and are connected with one another by "Practically, I did buy them. I pay "ways," or "troughs," through which my club prescription every year and transfers can readily be made when occasion requires. The numerous machines upon deck are necessary for away the club matches than you have the proper handling of the heavy cargo, ciated later. The big, funnel-like objects lining the bulwarks in places are buoys, useful in marking locations. We soon discover that the ship has really three crews or departments, each with its separate chiefs and officers. Nevertheless, they must all work in harmony, one with another, or things will go wrong. There is the steamship crew-captain, engineers, mates, quartermasters, stokers, deck hands, cooks and stewards-but even these men must be experienced in the special difficulties of navigation and labor with which they have to contend. Then there is a certain corps who have to do with the actual cable laving, picking up, buoying, etc., although, quite naturally, they are aided by the rest as occasion demands. Last of all on our list (but certainly not in importance) are the electricians, harged with the testing and calculating, which must go on continuously while the ship is at work in order to prevent costly mistakes.-Percie W. Hart, in Lippincott's.

Submarine's Deep Plunge. The submarine Silure has just been subjected to some interesting experiments. It was sunk to a depth of 135 feet with a view of testing the effect of the water pressure, which at this' depth is sixty-three pounds to the square inch. The commander and the more discomfort at this depth than at "So you cheat children as well, do the average submersion. The lowest depth attained in a caisson was 110% In my enthusiasm I had allowed my feet, with a pressure of forty-one eigar to go out. I relit it with the pounds, at the sinking of the piers for

Candy For Change.

"Some people wonder why we carry a stock of cheap candy, penny candy," men room matches. They don't mind said the man who keeps the railroad news-stand. "Well, you see it's this "How do you know they don't mind? way. I have a lot of regular custombeen buying two evening papers from If he has any pennies I never see.

New York City.-The illustration shows one of the season's most popu- an attractive finish around the bottom lar garments, an Eton of black taffeta of the wrapper. The skirt touches it with white peau de soie trimmings front and has a graceful sweep in the

and an ecru linen embroidered collar. The jacket is simply adjusted with shoulder and underarm seams. It reaches just to the waist line at the back and has a fashionable dip in front.

The fronts are shaped with single bust darts and may be fastened below the collar if so desired, but these jackets are usually worn open to display the fancy vest of neck piece worn be-

Bands of peau de sole finish the edges. The broad sailor collar is of the same material, covered with a separate collar of linen. It completes the neck and gives a becoming, broadshouldered effect.

Bands of velvet ribbon and lace form back. Bands of satin ribbon finish the collars and cuffs.

The mode may be developed in challe, albatross, cashmere, nun's vell ing, or French flannel. It is also ap propriate for lawn, dimity, gingham of mercerized cotton, and may be made with or without lining.

To make the wrapper in the medium size will require seven yards of thirty. six-inch material with three-quarter yards of all-over embroidery.

Summer Evening Fan. Any one desiring a pretty evening fan to wear with a cream lace dress or a dress daintily embellished with cream lace can get the same for little more than a dollar. The piece of creamy Chantilly is made the shape of a fan with a border design at all the four

shaped edges. Then it is stuck on the

sticks, which are dainty enough-in

deed, really pretty.

An Attractive Bit of Color. A black and yellow basket design embroidered on bands of white gives an attractive bit of color to a gown of white pique

A Dressy Little Frock.

Some dressy little frocks for summer wear are made of white wash silk which comes a few yards wide, and will launder just as well as a swiss or dimity. Both of these virtues are very desirable in fabrics for children's garments.

The dress shown here is made of white silk with lace trimmings. The waist is mounted on a fitted body lin-

WRAPPER WITH SAILOR COLLAR.

The sleeves are regulation coat models, fitted with upper and under portions. They have slight fulness on the shoulders and flare in bells at the

Etons in this style are made of peau de soie, moire, taffeta or any lightweight woolen fabric, and usually lined on the shoulders. with white, as they are intended to accompany light-colored waists. Tucked or hemstitched taffeta may be used for the collar and motifs of lace applied.

To make the Eton in the medium size will require two and one-half yards of twenty-two-inch material, with five-eighth yard of contrasting material for collar.

A Pretty Nightdress.

Here is a pretty and simple nightdress, and one made differently from most that are to be seen. It is cut a little low and square at the neck. and the sleeves are rather short. Neck and sleeves are finished with a band. perhaps an inch and a balf in depth. stitched several times, the rows of stitching being about a quarter of an inch apart. Through each of the openings is a narrow ribbon. The ribbons are brought out together at the sides of the sleeves and at the opening of the neck and tied. The lines of little ribbon bows look like soft rosettes and are very pretty.

Comfortable House Gown.

Cool, comfortable house gowns are made of China and India silk, which come in many different colors and are no more expensive than fine gingham. The possession of an attractive wrap per is a source of great satisfaction to most women, and the desire for stylish house garments should be en rouraged.

In the wrapper illustrated in the large drawing violet and black silk is trimmed with all-over lace and satin ribbons. It is mounted on a glove fitted lining that closes in the front.

Three backward turning tucks at each side of the centre back are stitched down a short distance, the fulness forming a Watteau back. A smooth adjustment is maintained under the arms.

The full fronts are gathered at the neck and drawn in at the waist with satin ribbons that are included in the under arm seams and tie in a bow with long ends. A high band turn-down collar completes the neck.

A broad sailor collar of lace is square in the back and forms long tabs in front. Bishop sleeves are finished with years old will require two and onelace cuffs, the points fastening on top | quarter yards of forty-inch material

ing that closes in the centre back and is cut slightly low at the neck.

The full front and backs are gathered at the upper and lower edges and arranged over the lining. The fulness at the neck is confined to the square portion, and the waist fits smoothly

The lining and body portions are joined separately in the underarm seam, and the waist blouses stylishly over the soft belt of pale blue liberty

satin. The sailor collar extends across the back and forms square tabs in front. It is fastened permanently on the left side and closes invisibly on the right. The sleeves are short, full puffs that terminate in narrow arm bands. Lace on the collar bands and waist provides

a stylish finish. The skirt is gathered in several rows of shirring at the top and arranged at the lower edge of the body portion, closing in the centre back. It is trimmed with two bands of lace. The shirring increases the size of the bips and makes a very becoming skirt for slender girls.

Dresses in this style are made of challie, albatross, crepe de chine, or-

gandie, lawn or dimity, with lace or ribbon for trimming.

To make the dress for a girl eight

Oldest Greek Papyrus.

An important Greek papyrus has been discovered by the German Orien- discovered in Australia, says the Goldtal Society at Abusir, near Sakkara, in en Penny, gold was first found by a Egypt. It contains the dithyramb on the Persian wars, by Timotheos of Miletus, a poet who lived about 400 charged with having stolen a watch B. C., whose name only had been pre- and "boiled it down," and, being conserved. The poem is long, and it is victed by the rude court of those early the first specimen of that kind of days, was given 150 lashes for his poetry that has come to light. The pains.
